

VEHICLE FOR HIRE POLICY

Red Deer Regional Airport acknowledges and encourages the development and success of vehicles for hire, commonly referred to as cabs or taxis, and the valuable service that these operators provide to our passengers and patrons. Without intention to restrict the operation of these operators, the Airport must make effective use of all areas available for vehicles near the terminals.

To facilitate recognition and orderly operation of multiple operators, the number of vehicles for hire that may be parked in front of the terminal building will be restricted to the number that can be accommodated in the designated marked area near the terminals.

When the designated area in front of the terminals is occupied, a staging area will be assigned for additional vehicles that are waiting for hire. This area will be identified and marked for the parking of vehicles for hire. Priority will be on a first come, first served philosophy that all operators must adhere to in good faith. Disputes arising from staging area parking will be dealt with appropriately by Airport Management.
